DETAILED ACTION

Page 2

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03 March 2006 has been entered.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 6, 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liardet (U.S. 4,864,790) in view of Hirsch (U.S. 4,849,145) and Zegler et al. (U.S. 5,567,497) further in view of Most (U.S. 2,161,549).

Application/Control Number: 10/705,256

Art Unit: 1772

Liardet teaches a floor tile or roll with a leather surface and a backing layer joined by adhesive (abstract, col. 9, lines 30-20). Zegler et al. teaches joining a top surface covering that has a layer which will fuse with thermoplastic to a thermoplastic base which has channels (abstract). Hirsch teaches joining thermoplastic to a leather layer by injection of the thermoplastic into openings in the leather layer and around edges of the leather layer (abstract, Figure 5, col. 1, lines 45-60). Most teaches the flow of plastic into holes in the interior of an outer layer in order to better bind the plastic to the outer layer and provide decorative effects (col. 2, lines 25-55).

The instant invention claims a leather floor tile with a thermoplastic backing that has resin that extends through holes in the leather layer that are located away from the perimeter of the leather layer. It would have been obvious to join a thermoplastic as the base layer of Liardet to prevent slipping because of the teachings of Zegler et al. (U.S. 5,567,497). It further would have been obvious to have joined the leather layer and bottom resin layer by injecting resin into holes of the leather layer instead of using adhesive because of the teachings of Hirsch. It still further would have been obvious to locate

Art Unit: 1772

the joining holes away from the perimeter of the upper leather layer in order to promote good joining and different decorative effects.

4. Applicant's arguments filed 03 March 2006 have been fully considered but are moot in view new grounds of rejection.

Most has been added to better address applicant's amended claim language regarding the resin filled being in the interior of the leather layer.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR of Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
